TU1208 GPR Association

TU1208 GPR Association was created on 13 September 2017 as a follow up of the COST Action TU1208 “Civil engineering applications of Ground Penetrating Radar,” to keep the scientific network alive and cohesive, to continue the excellent work that has been done in the framework of the Action, and to further support cooperation between Universities, research centres, private companies and public agencies active in the GPR field. TU1208 GPR Association inherited the same primary objective of the COST Action TU108, i.e., to exchange and increase scientific-technical knowledge and experience of GPR technique, while promoting the effective use of this safe and non-destructive method.

The research activities supported by TU1208 GPR Association cover all areas of the GPR technology, methodology, and applications. TU1208 GPR Association is active in the organization of scientific events, such as conferences, workshops, seminars, and training schools. The Association has a website (www.GPRadar.eu) and dedicated social media webpages. The Association carries out editorial activities, such as publication and dissemination of a newsletter, proceedings of events, educational material, journal papers, collections of papers, journals, books and multimedia documents useful to spread out the results of the studies and initiatives fulfilled by its Members. The Association supports the participation of its Members to scientific events organized by other institutions. The activities of the Association include any other initiative useful to foster the achievement of its primary objective.
